

TELAAH REKAM MEDIS TERTUTUP PADA KASUS *SECTIO CAESAREAN* TRIWULAN KE IV TAHUN 2017 DI RSUD WATES

Retnowati¹, Laili Rahmatul Ilmi²

INTISARI

Latar Belakang: Rumah sakit sebagai institusi pelayanan kesehatan haruslah memberikan pelayanan yang bermutu kepada masyarakat. Dalam rangka memberikan pelayanan yang bermutu tersebut maka dilakukan akreditasi rumah sakit. Salah satu aspek yang disurvei dalam akreditasi rumah sakit versi 2012 antara lain adalah dengan telaah rekam medis tertutup mengenai asesmen dan rekam medis lanjutan. Pada format telaah rekam medis tertutup mengenai asesmen dan rekam medis lanjutan memuat kelompok standar berfokus kepada pasien (APK, AP, PP, PAB, MPO, PPK) dan kelompok standar manajemen rumah sakit (MKI). Berdasarkan standar akreditasi rumah sakit 2012, rumah sakit mendapatkan sertifikat akreditasi apabila setiap bab dari standar akreditasi rumah sakit mempunyai nilai minimal 80%. Dari hasil observasi di RSUD Wates rata-rata persentase hasil perhitungan telaah rekam medis tertutup pada triwulan ke IV tahun 2017 pada kasus *sectio caesarean* baru mencapai 68%.

Tujuan: Tujuan penelitian ini adalah mengetahui persentase kelengkapan rekam medis tertutup mengenai persetujuan (*consent*), asesmen, dan rekam medis lanjutan di RSUD Wates sesuai dengan standar akreditasi rumah sakit 2012.

Metode : Jenis penelitian pada penelitian ini adalah deskriptif pendekatan kuantitatif. Teknik pengambilan data menggunakan observasi, dan studi dokumentasi. Teknik pengambilan sampel objek dengan cara random. Objek penelitian adalah berkas rekam medis rawat inap pada kasus *sectio caesarean* yang telah disimpan di rak filing pada triwulan IV tahun 2017 dengan sampel sebanyak 150 berkas.

Hasil: Persentase rata-rata kelengkapan hasil telaah rekam medis mengenai persetujuan (*consent*) mencapai 44%, asesmen mencapai 91%. Persentase rata-rata kelengkapan rekam medis lanjutan mencapai 70%.

Kata Kunci: Telaah Rekam Medis Tertutup, Persetujuan (*Consent*), asesmen, Standar Akreditasi RS 2012.

TELAAH REKAM MEDIS TERTUTUP PADA KASUS SECTIO CAESAREAN TRIWULAN KE IV TAHUN 2017 DI RSUD WATES

***The Study of Closed Medical Records In The Case Sectio Caesarean
Quarter IV in 2017 in RSUD Wates***

Retnowati¹, Laili Rahmatul Ilmi²

ABSTRACT

Background: Hospitals as health care institutions should provide quality services to the community. In order to provide quality services, then the hospital accreditation. One of the aspects surveyed in the 2012 hospital accreditation includes, among other things, the study of closed medical records on assessment and advanced medical records. In closed medical records review format on assessment and advanced medical records contains patient-focused standard groups (APK, AP, PP, PAB, MPO, PPK) and the hospital's management standards group (MKI). Based on the 2012 hospital accreditation standard, the hospital obtains an accreditation certificate if every chapter of the hospital accreditation standard has a minimum value of 80%. From the observation result in RSUD Wates, the average percentage of closed medical record review result in the fourth quarter of 2017 in case of sectio caesarean only reached 68%.

Objective: The purpose of this research is to know the percentage of the completeness of closed medical record regarding consent of assessment and medical record in RSUD Wates Hospital in accordance with the 2012 hospital accreditation standard

Methods The type of research in this research is descriptive quantitative approach. Technique of taking data using observation, and study of documentation. Technique of sampling object by way of random. The object of the study was an in-patient medical record file in a case of sectio caesarean which had been deposited on a filing shelf in the fourth quarter of 2017 with a sample of 150 files.

Result: The average percentage of completeness of medical record review of consent reached 44%, the assessment reached 91%. The average percentage of advanced medical record completeness reached 68%.

Keywords: Closed Medical Record Study, Approval, Assessment, Accreditation Standard RS 2012.
