

# KETEPATAN KODE DIAGNOSIS KASUS PERSALINAN TRIWULAN 1 PADA PASIEN RAWAT INAP DI RUMAH SAKIT KHUSUS IBU DAN ANAK SADEWA YOGYAKARTA

Oleh

Sely Nopita Sari<sup>1</sup>, Dr. Praptana., MPH<sup>2</sup>

## INTISARI

**Latar Belakang:** Penulisan kode ICD-10 yang tepat berguna untuk memberikan riwayat catatan kepada pasien, membandingkan data mortalitas dan morbiditas, mengetahui macam macam 10 besar penyakit karena itu petugas *coding* harus memiliki kemampuan dan keterampilan tentang cara pengodean diagnosis sesuai dengan standar prosedur yang berlaku. Karena kode yang tepat dapat menentukan besarnya klaim administrasi di Rumah Sakit.

**Tujuan Penelitian:** Mengetahui ketepatan kode diagnosis kasus persalinan triwulan 1 tahun 2018 dan faktor penyebab ketidaklengkapan pengkodean di Rumah sakit Khusus Ibu dan Anak Sadewa Yogyakarta.

**Metode Penelitian:** Deskriptif dengan pendekatan kualitatif. Rancangan penelitian yang digunakan adalah cross sectional. Sumber data yaitu sumber primer dan sumber sekunder. Sumber primer terdiri dari petugas coding rawat inap, koordinator rekam medis, dan kepala rekam medis. Sedangkan sumber sekunder terdiri dari SOP coding dan 35 berkas rekam medis kasus persalinan pasien rawat inap triwulan I. Metode pengambilan data: Wawancara, Studi Dokumentasi dan Observasi.

**Hasil Penelitian:** Prosentase ketepatan kode ICD-10 pada kasus persalinan belum mencapai 100% karena petugas belum mencantumkan kode outcome of delivery, petugas mengode SC elektif dan SC dikode O82.1. Faktor penyebab ketidaktepatan kode ICD-10 kasus persalinan yaitu pengisian diagnosis belum terisi lengkap oleh dokter yang merawat pasien, dan belum pernah dilakukan evaluasi atau audit coding.

**Kesimpulan:** Ketepatan kode ICD-10 pada kasus persalinan masih kurang baik dan faktor ketidaktepatan karena pengisian rekam medis terkait diagnosis kasus persalinan belum lengkap oleh dokter yang merawat pasien dan belum dilaksanakan audit atau evaluasi dibagian coding.

**Kata kunci:** Persalinan, Kode-ICD 10, Triwulan 1

# ACCURACY OF CODE DIAGNOSIS IN QUARTER 1ST DIAGNOSIS IN YOGYAKARTA PRIVATE HOSPITALS IN MOTHER AND CHILDREN'S SPECIAL HOSPITALS

Sely Nopita Sari<sup>1</sup>, Dr.Prapтана.,MPH<sup>2</sup>

## ABSTRACT

**Background:** Writing the right ICD-10 code is useful for providing patient history, comparing mortality and morbidity data, knowing the kinds of top 10 diseases because the coding officer must have the ability and skills on how to code the diagnosis in accordance with applicable procedure standards. the right code can determine the amount of administrative claims at the Hospital

**The Purpose Of The Research :** To find out the accuracy of the diagnosis code for the first quarter of 2018 labor cases and the factors causing incompleteness of coding in Sadewa Special Mother and Child Hospital Yogyakarta

**Research Methods:** Descriptive with a qualitative approach. The research design used was cross sectional. Data sources are primary sources and secondary sources. Primary sources include in-patient coding officers, medical record coordinators, and head of medical records. The secondary sources consisted of SOP coding and 35 medical records of births of inpatients in Q1.Methods of data retrieval: Interview, Documentation and Observation Study.

**Research Results:** The accuracy percentage of ICD-10 code in labor cases has not reached 100% because the officers have not included the outcome of delivery code, officers have elective SC coding and SC is coded O82.1. Factors that cause inaccuracy in the ICD-10 code of labor cases is that the filling of the diagnosis has not been fully completed by doctors who treat patients, and have never carried out an evaluation or coding audit.

**Conclusion:** The accuracy of the ICD-10 code in labor cases is still not good and the inaccuracy factor because the filling of medical records related to the diagnosis of childbirth cases is not complete by doctors who treat patients and have not carried out audits or evaluations in the coding section.

**Keywords:** Labor, Code-ICD 10, Quarter 1
