

**PENERAPAN UNIT NUMBERING SYSTEM SESUAI STANDAR MIRM
13 SNARS DI RS PKU MUHAMMADIYAH WONOSARI
TAHUN 2019**

Suri Antono Putra¹Sugeng²

INTISARI

Latar Belakang : Setiap pasien yang datang ke unit pelayanan kesehatan diberi satu nomor rekam medis yang berfungsi sebagai identitas pasien. Setiap pasien hanya mendapatkan satu nomor rekam medis yang dipakai untuk pelayanan rawat jalan maupun rawat inap. Sistem penomoran rekam medis berperan penting dalam memudahkan pencarian berkas rekam medis apabila pasien kembali datang berobat di sarana pelayanan kesehatan.

Tujuan Penelitian : Penerapan *Unit Numbering System* Sesuai Standar MIRM 13 SNARS di RS PKU Muhammadiyah Wonosari Tahun 2019.

Metode Penelitian : Jenis penelitian ini menggunakan metode penelitian deskriptif dengan pendekatan kualitatif. Rancangan penelitian pada penelitian ini menggunakan *cross sectional* atau potong lintang. Metode pengumpulan data dengan cara wawancara dan observasi.

Hasil : Sistem penomoran di Rumah Sakit PKU Muhammadiyah Wonosari sudah menggunakan *unit numbering system* dan memiliki SOP untuk sistem penomorannya akan tetapi dalam penerapannya masih terdapat kendala seperti terjadinya *mis file* dan masih terdapat duplikasi berkas rekam medis.

Kesimpulan : Sistem penomoran menurut mirm 13 snars di Rumah Sakit PKU Muhammadiyah Wonosari sudah menggunakan *unit numbering system* akan tetapi dalam penerapannya masih belum optimal.

Kata Kunci : Penerapan *Unit Numbering System*, RS PKU Wonosari

APPLICATION OF NUMBERING SYSTEM UNITS ACCORDING TO 13 SNARS MIRM STANDARDS IN PKU MUHAMMADIYAH WONOSARI HOSPITAL YEAR 2019

Suri Antono Putra¹Sugeng²

ABSTRACT

Background: Every patient who comes to the health service unit is given a medical record number that works as the patient's identity. Each patient only gets one medical record number that is used for outpatient care as well as inpatient care. The medical record numbering system seeks to be important in searching medical records asking patients to come back for treatment at a health service facility.

Research Objectives: Implementation of Unit Numbering System in Accordance with SNARS MIRM 13 Standards at PKU Muhammadiyah Hospital Wonosari in 2019.

Research Methods: This type of research uses descriptive research methods with a qualitative approach. The study design in this study using cross sectional or cross sectional. Data collection methods by means of interview and observation.

Results: The numbering system at PKU Muhammadiyah Wonosari Hospital already uses a unit numbering system and has an SOP for the numbering system but in its application there are still obstacles such as mis files and still duplicate medical records.

Conclusion: The numbering system according to mirm 13 snars in PKU Muhammadiyah Wonosari Hospital already uses a unit numbering system but in its application it is still not optimal.

Keywords: Application Of Numbering System Units, RS PKU Wonosari
