

TINJAUAN PELAKSANAAN KESELAMATAN DAN KESEHATAN KERJA PETUGAS PENDAFTARAN PASIEN DALAM MENGHADAPI PANDEMI *COVID-19* DI RUMAH SAKIT NUR HIDAYAH BANTUL

Laila Putri Nur Rahmah¹, Praptana², Kori Puspita Ningsih³

INTISARI

Latar belakang: Di Rumah Sakit Nur Hidayah ditemukan masalah bahwa pelaksanaan Keselamatan dan Kesehatan Kerja (K3) di masa Pandemi *Covid-19* terdapat petugas tidak menggunakan sarung tangan medis sekali pakai saat melayani pasien, terdapat salah satu diantara tiga petugas pendaftaran yang bekerja, lalai menerapkan *handrub* atau mencuci tangan setelah melayani pasien. Tujuan dari penelitian ini adalah untuk mengetahui penerapan keselamatan kerja dari wabah *covid-19* yang dilakukan oleh petugas pendaftaran.

Metode: Pada penelitian ini menggunakan pendekatan deskriptif kualitatif. Subjek dari penelitian ini adalah petugas pendaftaran dan petugas Pencegahan dan Pengendalian Infeksi (PPI). Data dikumpulkan menggunakan instrumen pedoman wawancara, *checklist* observasi, dan pedoman studi dokumentasi.

Hasil: Pelaksanaan keselamatan dan kesehatan kerja dalam penggunaan APD di masa *covid-19* ini petugas pendaftaran di Rumah Sakit Nur Hidayah sudah menjalankan dengan baik, tetapi didapati masalah yaitu adanya petugas yang lalai dalam penggunaan *handrub* ketika sebelum dan sesudah melayani pasien yang mendaftar.

Kesimpulan: Dalam memaksimalkan keselamatan dan kesehatan kerja sebaiknya diadakannya pelatihan dalam menggunakan APD dengan baik dan benar, agar dapat meminimalisir kecelakaan kerja yaitu terpaparnya petugas dari wabah *covid-19* saat bekerja.

Kata kunci: Petugas Pendaftaran, *Covid-19*, Keselamatan dan Kesehatan Kerja, Alat Pelindung Diri

REVIEW OF THE IMPLEMENTATION OF OCCUPATIONAL SAFETY AND HEALTH OF PATIENT REGISTRATION OFFICERS IN FACING THE COVID-19 PANDEMIC AT NUR HIDAYAH BANTUL HOSPITAL

Laila Putri Nur Rahmah¹, Praptana², Kori Puspita Ningsih³

ABSTRACT

Background: At Nur Hidayah Hospital, a problem was found that the implementation of Occupational Safety and Health (K3) during the Covid-19 Pandemic there were officers who did not use disposable medical gloves when serving patients, there was one of the three registration officers who worked, neglected to apply handrub or wash hands after serving the patient. The purpose of this study was to determine the application of work safety from the covid-19 outbreak carried out by registration officers.

Method: This research uses a qualitative descriptive approach. The subjects of this study were registration officers and infection prevention and control (PPI) officers. Data were collected using interview guide instruments, observation checklists, and documentation study guidelines..

Result: The implementation of occupational safety and health in the use of PPE during the Covid-19 period, the registration officer at the Nur Hidayah Hospital was running well, but a problem was found, namely that there were officers who were negligent in using handrub before and after serving registered patients.

Conclusion: In maximizing occupational safety and health, it is better to hold training in using PPE properly and correctly, in order to minimize work accidents, namely exposure of officers from the COVID-19 outbreak while working.

Keywords: Registration Officer, Covid-19, Occupational Safety And Health, Personal Protective Equipment, Admission.
