

REDESAIN FORMULIR DAN DESAIN MAP REKAM MEDIS LAYANAN KESEHATAN DI KLINIK IBU DAN ANAK GRIYA SEKAR GANTARI

Ninda Rifki Damayanti¹, Laili Rahmatul Ilmi²

INTISARI

Latar Belakang : Klinik merupakan fasilitas pelayanan kesehatan yang diselenggarakan perorangan yang hanya menyediakan layanan medis dasar dimana klinik dibagi menjadi dua yaitu klinik pratama dan klinik utama. Untuk meningkatkan mutu pelayanan kesehatan di fasyankes termasuk klinik perlu didukung dengan adanya penyelenggaraan rekam medis dimana rekam medis adalah suatu berkas yang berisikan catatan pasien berupa data identitas pasien, pemeriksaan, pengobatan dan tindakan medis. Rekam medis sendiri terdiri dari beberapa formulir pasien yang digunakan sebagai alat pengumpulan data pasien dimana formulir tersebut membutuhkan suatu map rekam medis untuk melindungi formulir pasien agar tidak mudah rusak maupun hilang. Di klinik ibu dan anak griya sekar gantari telah memiliki formulir layanan kesehatan bagi pasien namun formulir tersebut dirasa belum sesuai dengan aturan yang ada dan belum memiliki map rekam medis yang sesuai standar untuk melindungi formulir-formulir pasien.

Tujuan : Redesain formulir dan desain map rekam medis layanan kesehatan di klinik ibu dan anak griya sekar gantari.

Metode penelitian : Penelitian ini merupakan penelitian kualitatif deskriptif dengan pendekatan fenomenologi.

Hasil penelitian : Dalam pelaksanaan layanan kesehatan klinik ibu dan anak griya sekar gantari telah melakukan pendokumentasian atau rekam medis seperti pembuatan formulir pasien dan terdapat map rekam medis. Namun formulir dan map rekam medis yang dibuat dirasa belum sesuai sehingga dilakukan perancangan ulang formulir layanan kesehatan yang disesuaikan dengan aturan yang ada agar formulir tersebut mencakup informasi pasien secara lengkap serta membuat desain map rekam medis yang sesuai dengan kebutuhan dan aturan agar formulir-formulir tersebut tidak mudah rusak, hilang atau terselip dengan formulir pasien lain.

Kesimpulan : Klinik ibu dan anak griya sekar gantari sudah memiliki formulir layanan kesehatan pasien namun dalam pembuatannya belum sesuai aturan yang ada dan belum memiliki map rekam medis untuk melindungi formulir-formulir tersebut.

Kata kunci : Rekam medis, redesain formulir, desain map rekam medis

**REDESIGN OF THE FORM AND MAP DESIGN OF MEDICAL
RECORDS OF HEALTH SERVICES AT GRIYA SEKAR GANTARI
MOTHER AND CHILD CLINIC**

Ninda Rifki Damayanti¹, Laili Rahmatul Ilmi²

ABSTRACT

Background: Clinic is a health service facility organized by individuals that only provides basic medical services where the clinic is divided into two, namely the primary clinic and the main clinic. To improve the quality of health services in health facilities including clinics, it is necessary to support the implementation of medical records where medical records are a file containing patient records in the form of patient identity data, examinations, treatment and medical actions. The medical record itself consists of several patient forms that are used as a tool for collecting patient data where the form requires a medical record folder to protect the patient form from being easily damaged or lost. In the mother and child clinic, the company already has a health care form for patients but the form is not in accordance with the existing rules and does not have a medical record folder that meets the standards to protect patient forms.

Purpose: Redesign of forms and map design of medical records of health services at the maternal and child clinic.

Method: This research is a descriptive qualitative research with a phenomenological approach.

Results: In the implementation of maternal and child clinic health services, griya sekar gantari has documented or medical records such as making patient forms and there is a medical record folder. However, the medical record forms and folders that were made were not suitable so that a redesign of health service forms was carried out that were adjusted to the existing rules so that the forms included complete patient information and made a medical record map design that was in accordance with the needs and rules so that the forms were not easily damaged, lost or tucked away with other patient forms.

Conclusion: The mother and child clinic already has a patient health service form but in its manufacture it is not in accordance with the existing rules and does not yet have a medical record folder to protect these forms.

Keywords : Medical records, form redesign, medical record folder design
