

TINJAUAN ASPEK KEAMANAN REKAM MEDIS DI RUANG *FILING* PUSKESMAS SLEMAN

Ana Kurniadi¹, Sis Wuryanto²

INTISARI

Latar Belakang: Rekam Medis menyatakan bahwa informasi tentang identitas, diagnosis, riwayat penyakit, riwayat pemeriksaan dan riwayat pengobatan pasien harus dijaga kerahasiaannya oleh dokter, dokter gigi, tenaga kesehatan tertentu, petugas pengelola dan pimpinan sarana pelayanan kesehatan. Dimana seluruh informasi terkait riwayat pasien disimpan secara rahasia baik dari aspek fisik maupun aspek isi.

Tujuan: Mengetahui aspek keamanan rekam medis di ruang *filing* Puskesmas Sleman.

Metode Penelitian: Jenis penelitian yang digunakan dalam penelitian ini adalah deskriptif dengan pendekatan kualitatif. Metode pengumpulan data menggunakan wawancara dan observasi.

Hasil Penelitian: Keamanan rekam medis dari aspek fisik belum seluruhnya aman. Terdapat beberapa komponen yang belum aman seperti dari kebakaran dan banjir, pihak yang tidak berwenang, dan pencahayaan yang kurang. Keamanan rekam medis dari aspek isi masih terdapat petugas selain rekam medis yang berada di ruang *filing*, sering terjadi kehilangan rekam medis karena *missfile*. Upaya yang sudah dilakukan oleh pihak Puskesmas yaitu dengan adanya SOP sebagai acuan petugas.

MEDICAL RECORD SECURITY REVIEW ASPECT IN SLEMAN HEALTH CENTER FILING ROOM

Ana Kurniadi¹, Sis Wuryanto²

ABSTRACT

Background: Medical Records informed about the identity, diagnosis, disease history, examination history and treatment history of patients must be kept confidential by doctors, dentists, certain health workers, management officers and leaders of health service facilities. Where all information related to patient history is kept confidential both from the physical aspect and the content aspect.

Objective: To determine the security aspects of medical records in the Sleman Public Health Center filing room.

Research Methods: The type of research used in this study is descriptive with a qualitative approach. Data collection methods used interviews and observation.

Research Results: The safety of medical records from the physical aspect have not entirely safed. There were some unsafe components such as fire and flood, unauthorized parties, and poor lighting. Security of medical records from the aspect of contents were not officers medical records in the filing room, often losing medical records due to missfiles. Existence of SOPs as a reference officer was the effort from Puskesmas to overcome this.
