

TINJAUAN PUSTAKA KETEPATAN *CODING* KASUS CEDERA

Selly Zantivia Agustina¹. Kuswanto Hardjo²

INTISARI

Latar Belakang: Seorang perekam medis harus mampu menetapkan kode penyakit dengan tepat sesuai klasifikasi yang diberlakukan di Indonesia (ICD-10). *Coding* diagnosis harus lengkap dan tepat sesuai arahan ICD-10. Berdasarkan studi literasi, yang dilakukan terhadap jurnal ditemukan bahwa pelaksanaan *coding* masih belum sesuai dengan peraturan yang ditetapkan.

Tujuan Penelitian: Tujuan penelitian ini adalah untuk mengetahui tingkat ketepatan *coding* kasus cedera dengan *literature review*

Metode Penelitian :Penelitian ini menggunakan metode penelitian *literature review*, dengan teknik mengkritisi.

Hasil Penelitian: Dijumpai beberapa ketidaksesuaian penilaian ketepatan *coding* kasus cedera dari hasil penelitian Ikhwan, Adinda Putri Amalia, Amalia Wulandari, Carlina Mahardika Loka, dan Jeff Bagaskoro

Kesimpulan: Penilaian ketepatan kode kasus cedera oleh kelima peneliti kurang meyakinkan, perlu verifikasi kepada ahli *coding*, supaya lebih meyakinkan kebenarannya.

Kata Kunci: Ketepatan, *Coding*, ICD 10

**LITERATURE REVIEW OF CODING ACCURACY
INJURY CASE**

Selly Zantivia Agustina¹. Kuswanto Hardjo²

ABSTRACT

Background: A medical recorder must be able to determine the exact disease code according to the classification in force in Indonesia (ICD-10). The diagnosis coding must be complete and correct according to ICD-10 directives. Based on literacy studies, conducted on journals found that the implementation of the coding is still not in accordance with the regulations set.

Research Objectives: The purpose of this study was to determine the level of accuracy of injury case coding with the literature review

Research Methods: This study used a literature review research method, with a critique.

Research Results: Several discrepancies in the assessment of the accuracy of the coding of injury cases were found from the results of the Ikhwan research, Adinda Putri Amalia, Amalia Wulandari, Carlina Mahardika Loka, and Jeff Bagaskoro.

Conclusion: The assessment of the accuracy of the injury case code by the five researchers was inconclusive, it needed verification to the coding expert, so that it was more convincing.

Keywords: Accuracy, Coding, ICD 10
