

ANALISIS KEBUTUHAN RAK REKAM MEDIS DI RUMAH SAKIT

DENGAN LITERATURE REVIEW

Linda Anggraeni¹. Laili Rahmatul Ilmi².

INTISARI

Latar Belakang: Banyaknya pasien yang berkunjung ke rumah sakit mengakibatkan ketebalan dan kebutuhan berkas rekam medis terus meningkat menyebabkan rak penyimpanan menjadi penuh. Oleh karena itu diperlukan rak rekam medis dan ruang penyimpanan yang memadai.

Tujuan Penelitian: Mengetahui *review* mengenai tingkat kebutuhan rak rekam medis dan luas ruangan.

Jenis Penelitian: Penelitian ini menggunakan metode *literature review* dengan menggunakan 4 jurnal mengenai kebutuhan rak rekam medis dan luas ruangan di rumah sakit.

Hasil Penelitian: Keempat jurnal kebutuhan rak rekam medis dan luas ruangan menyatakan bahwa rak penyimpanan yang sudah penuh perlu dilakukan penambahan rak baru agar berkas rekam medis lebih tertata. Penambahan rak harus diiringi dengan penganalisaan terhadap ruang penyimpanan yang tersedia, sehingga syarat-syarat ruangan ideal dapat terpenuhi. Berdasarkan jurnal yang direview diketahui bahwa 1 jurnal memiliki ruangan yang memadai sedangkan 3 jurnal lainnya masih membutuhkan penambahan ruang penyimpanan apabila melakukan penambahan rak rekam medis.

Kesimpulan: Kebutuhan rak rekam medis terus bertambah seiring waktu oleh karena itu perlu dilakukan perhitungan rak rekam medis dengan memperhatikan luas ruangan yang dibutuhkan.

Kata Kunci: Rekam medis, Rak rekam medis, Ruang penyimpanan.

ANALYSIS OF NEEDS OF MEDICAL RECORDING SHELF IN HOSPITAL WITH LITERATURE REVIEW

Linda Anggraeni¹. Laili Rahmatul Ilmi².

ABSTRACT

Background: The number of patients visiting the hospital resulted in increased thickness and the need for medical record files causing storage racks to become full. Therefore, a medical record rack and adequate storage space are needed to store medical record files.

Purpose: Knowing the review of needs for medical record shelves and storage of room of medical record file and room size.

Method: This research uses the literature review method using by 4 journals regarding the need for medical record racks and room size in the hospital.

Result: The four journals the need for medical record racks and room area stated that the storage racks that were already full needed to be added with new shelves so that the medical record files were more organized. The addition of shelves must be accompanied by an analysis of the available storage space, so that the ideal space requirements can be met. Based on the journals reviewed, it is known that 1 journal has adequate space while the other 3 journals still require additional storage space when adding medical record racks

Conclusion: The need for medical record racks is due to an increase in patient visits to the hospital. The process of adding a medical record rack needs to be accompanied by analyzing the storage space requirements so that it meets the standard.

Keywords: Medical records, Medical record shelves, Storage space.
