ANALISIS KELENGKAPAN LEMBAR RESUME MEDIS RAWAT INAP TRIWULAN 1I DI RUMAH SAKIT UMUM QUEEN LATIFA YOGYAKARTA

Septi Susilowati[1], Suryo Nugroho Markus[2]

INTISARI

Latar Belakang: Rumah Sakit adalah institusi pelayanan kesehatan yang menyelenggarakan pelayanan kesehatan perorangan serta paripurna yang menyediakan pelayanan rawat inap, rawat jalan dan rawat darurat. Pelayanan yang diberikan dimulai pada saat pasien melakukan admisi, dilanjutkan dengan pencatatan data medis pasien yang mendapat pelayanan di rumah sakit, serta penanganan berkas rekam medis. Berdasarkan hasil studi pendahuluan di RS Queen Latifa Yogyakarta diperoleh data resume medis yang tidak lengkap yaitu 7 berkas rekam medis dan peneliti mengambil jumlah sampel 10 berkas rekam medis atau 10 lembar resume medis.

Tujuan: Tujuan penelitian ini adalah untuk mengetahui faktor penyebab tidak lengkapnya lembar resume medis pasien rawat inap triwulan II di Rumah Sakit Queen Latifa Yogyakarta.

Metode: Penelitian ini menggunakan deskriptif kualitatif. Rancangan penelitian menggunakan *Cross Sectional* (potong lintang). Sampel subjek pada penelitian ini yaitu 2 petugas rekam medis, 2 dokter dan 1 perawat. Sampel objek pada penelitian ini yaitu 88 berkas rekam medis rawat inap atau 88 lembar *resume* medis. Teknik pengambilan sampel subjek menggunakan *purposive sampling*, sedangkan objek menggunakan *systematic random sampling*. Teknik pengumpulan data menggunakan pengamatan, wawancara dan studi dokumentasi.

Hasil: Berdasarkan hasil studi dokumentasi pada bulan Agustus terhadap 88 berkas rekam medis khususnya lembar resume medis di Rumah Sakit Queen Latifa Yogyakarta di dapatkan hasil analisis kuantitatif menunjukan presentase kelengkapan keseluruhan dari 88 berkas yaitu: Komponen identifikasi sebanyak 73 berkas (82,96%)**,** Komponen laporan penting sebanyak 64 berkas (72,72%)**,** Komponen autentikasi sebanyak 65 berkas (73,87%), Komponen pendokumentasian yang benar sebanyak 61 berkas (69,31%)

Kata Kunci: Presentase, Kelengkapan, *Resume*, Rawat Inap, Faktor, Penyebab, Solusi, Queen Latifa Yogyakarta

ANALYSIS OF THE COMPLETENESS OF THE MEDICAL RESUME SHEET IN THE QUARTER 1I HOSPITAL IN YOGYAKARTA LATIFA QUEEN GENERAL HOSPITAL

Septi Susilowati[1], Suryo Nugroho Markus[2]

ABSTRACT

Background:*Hospital is a health service that provides health services and services that provide inpatient, outpatient and emergency care services. Services provided start when the patient performs an admission, accompanied by recording data on patients receiving services at the hospital, as well as handling medical record files. Based on the results of a preliminary study at the Queen Latifa Hospital in Yogyakarta, an incomplete medical resume data was obtained, namely 7 medical record bodies and researchers took a sample of 10 medical record files or 10 medical resume sheets.*

Objective: *The purpose of this study was to determine the factors causing incomplete resume of second quarter inpatients at Queen Latifa Hospital in Yogyakarta.*

Method: *This study uses qualitative descriptive. Design research using Cross Sectional. Subject samples in this study were 2 medical record officers, 2 doctors and 1 nurse. The object of research in this study is 88 inpatient medical records or 88 medical resume sheets. The sampling technique uses purposive sampling, while objects use systematic random sampling. Data writing techniques use observation, interviews and documentation studies.*

Results: *based on the results of a documentation study in August of 88 medical records, especially medical resume sheets at Queen Latifa Hospital in Yogyakarta, the results of quantitative analysis showed the percentage of completeness of 88 files, namely: Components of 73 files (82.96%), Components of important reports 64 files (72.72%), authentication components as many as 65 files (73.87%), correct documentation components as many as 61 files (69.31%)*
