

HUBUNGAN KECERDASAN EMOSIONAL PERAWAT DENGAN PERILAKU *CARING* PERAWAT DI RUANG RAWAT INAP RSUD PANEMBAHAN SENOPATI BANTUL

Ridwan¹, Ngatoiatu Rahmani²

INTISARI

Latar Belakang: Perilaku *caring* adalah esensi dari keperawatan yang membedakan perawat dengan profesi lain. *Caring* merupakan suatu cara pendekatan yang dinamis, dimana perawat bekerja untuk lebih meningkatkan kepeduliannya kepada klien. Salah satu faktor yang dapat mempengaruhi perilaku *caring* adalah kecerdasan emosional. Kecerdasan emosional merupakan suatu kemampuan mengenal makna emosi dan hubungan emosi-emosi, serta mampu memberikan alasan dan penyelesaian.

Tujuan Penelitian: Mengetahui hubungan kecerdasan emosional dengan perilaku *caring* perawat di ruang rawat inap Rumah Sakit Penambahan Senopati Bantul.

Metode Penelitian: Jenis penelitian ini adalah *deskriptif kolerasi* dengan pendekatan *cross sectional*. Jumlah sampel diambil dengan *stratified random sampling* sebanyak 25 perawat dan sampel pasien sebanyak 25. Instrumen kecerdasan emosional menggunakan kuesioner Mulyani (2008), sedangkan instrumen perilaku *caring* perawat menggunakan kuesioner Yuliawati (2012). Teknik analisa data yang digunakan dengan uji *Kendall Tau*.

Hasil Penelitian: Kecerdasan emosional perawat di ruang rawat inap Rumah Sakit Penambahan Senopati Bantul memiliki kategori sedang (68%). Perilaku *caring* perawat di ruang rawat inap Rumah Sakit Penambahan Senopati Bantul Dalam kategori cukup (48%). Ada hubungan yang signifikan antara kecerdasan emosional perawat dengan perilaku *caring*, hal ini ditunjukkan dengan hasil analisa bivariat *Kendall Tau*, yaitu $p=0,029 < 0,05$. dengan $r= 0,433$

Kesimpulan: Ada hubungan yang signifikan kecerdasan emosional dengan perilaku *caring* perawat di ruang rawat inap Rumah Sakit Penambahan Senopati Bantul, ditunjukkan dengan hasil uji Kendall tau diperoleh nilai $p 0,029 < 0,05$.

Kata Kunci: Kecerdasan Emosional Perawat, Perilaku *Caring* Perawat

**THE CORRELATION BETWEEN NURSE'S EMOTIONAL
INTELLIGENCE AND NURSE'S CARING BEHAVIOR
IN INPATIENT WARD OF PANEMBAHAN SENOPATI
GENERAL HOSPITAL OF BANTUL**

Ridwan¹, Ngatoiatu Rahmani²

ABSTRACT

Background: Caring behavior is the essence of nursing which distinguishes a nurse from other professions. Caring is a dynamic approach by which a nurse works to provide more attention to a patient. One of factors that may influence caring behavior is emotional intelligence which is an ability to understand emotional expressions and emotional relations and also to give reasons and solutions.

Objective: To identify The Correlation between Nurse's Emotional Intelligence and Nurse's Caring Behavior in Inpatient Ward of Panembahan Senopati General Hospital of Bantul

Method: The type of this study was descriptive and correlational with cross sectional approach. The number of samples was 25 nurses and 25 patients selected through stratified random sampling technique. The instrument of emotional intelligence applied Mulyani questionnaire (2008). Instrument of caring behavior applied Yuliawati questionnaire (2012). Data analysis technique applied Kendall Tau test formula.

Result: Nurse's emotional intelligence in inpatient ward of Panembahan Senopati general hospital of Bantul was in sufficient category (68%). Nurse's caring behavior in inpatient ward of Panembahan Senopati general hospital of Bantul was in sufficient category (48%). There were significant correlations between emotional intelligence and caring behavior which were reflected from the result of bivariate analysis of Kendall Tau test with p value of $0,029 < 0,05$ and r value of 0,43.

Conclusion: There were significant correlations between emotional intelligence and caring behavior in inpatient ward of Panembahan Senopati general hospital of Bantul which were figured out by the result of Kendall Tau test with p value of $0,029 < 0,05$.

Keywords : Nurse's Emotional Intelligence, Nurse's Caring Behavior
