OVERVIEW OF THE ACTIVENESS OF THE ELDERLY AND THE LEVEL OF SATISFACTION WITH THE SERVICES OF THE ELDERLY POSYANDU

ABSTRACT

Intan Nurfadilla¹, Anastasia Suci², Suwarno³

Background : Posyandu lansia is a service that provides integrated services for the elderly in the community. The main purpose of the elderly posyandu is to increase knowledge, attitudes, positive behavior, and the reach of elderly health services in the community. This includes tailoring services to them, as well as increasing community participation and private sector involvement.

Objective : This study aims to determine the picture of the level of activity of the elderly and the level of satisfaction with the services of the elderly posyandu.

Method: the research method used is classified as a quantitative analytical research category using a cross-sectional approach. The population in this study consisted of 56 elderly people aged ≥ 60 years who were registered as members of the elderly posyandu and were permanent residents of Sembungan hamlet In this study, the sample consisted of 56 elderly people who were in the working area of Puskesmas Kasihan I.

Results : Based on the results of the study, it is known that the majority of respondents are in the age range of 60-75 years (83.9%). 9 respondents were in the age range of 75-80 (16.1%). With the lowest age is 60 and the highest age is 80 years old. Respondents based on gender involved in this study were women with 39 people (69.6%) and men 17 people (30.4%). Furthermore, as many as 7 people (12.5%) have a high school education level, none of the respondents have a junior high school education and there is only 1 person (1.8%) who has an education level background equivalent to college. From the results of a study of 56 elderly respondents, the distance from home to posyandu was obtained the most, namely ≤ 2 km, which was 37 respondents (66.1%), while respondents with a house distance of > 2 km were 19 people (33.9%).

Conclusion: Most of the elderly in Padukahan Sembungan make good use of the elderly posyandu so that many elderly are active and the majority express satisfaction with the services provided by the elderly posyandu officers Amaryllis Sembungan Hamlet.

Keywords : Elderly, Posyandu, Satisfaction Level.
