Latar Belakang: Kebutuhan untuk tidur sangat penting bagi setiap orang. Kualitas tidur merupakan keadaan dimana tidur yang dijalani seseorang individu menghasilkan kesegaran dan kebugaran disaat terbangun. Kualitas tidur yang baik akan memengaruhi proses dalam belajar, kondisi kesehatan, dan meningkatkan konsentrasi minat dalam belajar. Siswa yang memiliki kualitas tidur baik akan memiliki prestasi belajar yang baik.

Tujuan: Penelitian ini bertujuan untuk mengetahui hubungan antara kualitas tidur dengan prestasi akademik mahasiswa keperawatan Universitas Jendral Achmad Yani Yogyakarta.

Metode: Jenis penelitian adalah deskristif korelatif dengan rancangan penelitian menggunakan pendekatan *Cross-sectional*, sampel diambil dengan teknik *proportional random sampling* dengan responden sebanyak 205 mahasiswa. Instrumen penelitian adalah kuesioner.

Hasil: Hasil penelitian dianalisis dengan rumus *Spearman Rank*. Hasil penelitian menunjukkan sebagian besar mahasiswa memiliki prestasi akademik sangat memuaskan yaitu sebanyak 105 siswa (51,2%). Kualitas tidur mahasiswa menunjukkan bahwa sebagian besar mahasiswa memiliki kualitas tidur buruk sebanyak 153 mahasiswa (74,6%). Hasil perhitungan uji statistik menggunakan uji *Spearman Rank* diperoleh $p=0,000 (<0,05)$.

Kesimpulan: ada hubungan antara kualitas tidur dengan prestasi akademik mahasiswa keperawatan Universitas Jendral Achmad Yani Yogyakarta.

Kata Kunci : kualitas tidur, prestasi akademik mahasiswa
