LEARNING MOTIVATION FOR NURSING STUDENTS FOR THE 2021 WHEN LEARNING ONLINE AT UNIVERSITY JENDERAL ACHMAD YANI YOGYAKARTA

Dini Nuraini Wulandari¹, Masta Hutasoit²

ABSTRACT

Background: The outbreak of the Covid-19 virus, lecture activities are carried out online from home. One of the factors driving the success of online learning is learning motivation. Nursing students of the 2021 batch still need a lot of adaptation and guidance in conducting lectures with online learning.

Objective: This study aims to describe the learning motivation of nursing students batch 2021 while undergoing online learning at Jenderal Achmad Yani University, Yogyakarta.

Methods: This study used a descriptive research method with a cross sectional approach. The sampling method used was random sampling as many as 54 active nursing students batch 2021 who were carrying out online learning. Collecting data using a student learning motivation questionnaire with a Likert scale. Data analysis used univariate analysis.

Results: The results showed that the characteristics of the majority of respondents were female by 85,2%, age 19 years 38,9%, the area of origin of students mostly came from the island of Java 70,4% and the reason why students majored in nursing was the majority aspiration itself by 81,5%. Based on the results of the study, the level of learning motivation of nursing students class of 2021 who took online learning at Jenderal Achmad Yani University Yogyakarta was 40,7% in the high category, 35,2% in the medium category and 24,1% in the low category.

Conclusion: Nursing students batch 2021 at Jenderal Achmad Yani University Yogyakarta have high motivation towards online learning during the Covid-19 pandemic. The Covid-19 pandemic period did not hinder the motivation of students to carry out learning activities even though they were carried out online.
