

TINJAUAN PELAKSANAAN PELEPASAN INFORMASI PASIEN COVID-19 BERDASARKAN REKAM MEDIS DI RSU QUEEN LATIFA SLEMAN

Fatin Alfain¹, Eniyati², Zakharias Kurnia Purbobinuko³

INTISARI

Latar Belakang: Rekam medis salah satu peran penting dalam fasilitas pelayanan kesehatan. Pada rekam medis pasien terdapat lembar persetujuan atau general consent untuk pesetujuan siapakan yang berhak mengetahui data sosial dan klinis pasien yang telah di tertera dalam Standar Prosedur Operasional (SPO) pelepasan informasi pasien covid-19. Rekam medis sebagai alat dokumentasi data pemeriksaan pasien di rumah sakit berperan penting dalam menjaga kerahasiaan data pasien covid-19.

Tujuan Penelitian: Untuk Mengetahui pelaksanaan pelepasan informasi pasien covid-19 berdasarkan rekam medis di Rumah Sakit Umum Queen Latifa Sleman.

Metode Penelitian: Metode Penelitian ini menggunakan metode deskriptif dengan pendekatan kualitatif dan rancangan penyusunan yang menggambarkan data sebagai hasil dari penelitian

Hasil Penelitian: Hasil penelitian menunjukkan bahwa pelaksanaan pelepasan informasi pasien covid-19 di RSU Queen Latifa sudah sesuai dengan regulasi dengan acuan surat edaran dari dinas kesehatan. SPO pelepasan infomasi pasien covid-19 menjelaskan secara rinci bagaimana pelaporan pasien covid-19 ke dinas kesehatan. Lembar general consent pada rekam medis pasien covid-19 masih terdapat pasien atau wali tidak memberikan keterangan perizinan pelepasan informasi.

Kesimpulan: pelaksanaan pelepasan infomasi pasien covid-19 belum dilakukan dengan semestinya petugas rekam medis seharusnya memeriksa kembali formulir general consent yang di berikan kepada wali atau pasien supaya rekam medis terjamin isinya dan dapat menjadi bukti kuat di mata hukum.

Kata Kunci: Rekam Medis, General Consent, Pelepasan informasi pasien covid-19

REVIEW OF THE IMPLEMENTATION OF THE DISCLOSURE OF COVID-19 PATIENT INFORMATION BASED ON MEDICAL RECORDS AT QUEEN LATIFA GENERAL HOSPITAL SLEMAN

Fatin Alfain¹, Eniyati², Zakharias Kurnia Purbobinuko³

ABSTRACT

Background: Medical records are one of the important roles in health care facilities. In the patient's medical record there is a general consent form for approval of who has the right to know the social and clinical data of the patient that has been listed in the Standard Operating Procedure (SOP) for the release of covid-19 patient information. Medical records as a means of documenting patient examination data in hospitals play an important role in maintaining the confidentiality of covid-19 patient data.

Purpose: To find out the implementation of the release of covid-19 patient information based on medical records at Queen Latifa General Hospital, Sleman.

Method: This research method uses a descriptive method with a qualitative approach and a compilation design that describes the data as a result of the research

Result: The results showed that the implementation of the release of information on covid-19 patients at Queen Latifa Hospital was in accordance with regulations with reference to circulars from the health department. The SOP for releasing information on covid-19 patients explains in detail how to report covid-19 patients to the health department. The general consent sheet in the medical record of a covid-19 patient still contains a patient or guardian who does not provide information on the release of information.

Conclusion: the implementation of the release of information on covid-19 patients has not been carried out properly, the medical record officer should re-examine the general consent form given to the guardian or patient so that the contents of the medical record are guaranteed and can be strong evidence in the eyes of the law.

Keywords: Medical Records, General Consent, Release of Covid-19 patient information
