

## DESAIN REKAM MEDIS DAN FORMULIR DI PUSKESMAS KASIHAN II BANTUL TAHUN 2020

Noor Tata Afni<sup>1</sup> . Laili Rahmatul Ilmi<sup>2</sup>

### INTISARI

**Latar Belakang :** Setiap fasilitas kesehatan salah satunya puskesmas wajib menyelenggarakan rekam medis. Puskesmas Kasihan II Bantul menggunakan sistem penomoran UNS (*Unit Numbering System*) dengan *family numbering* atau *family folder*, yaitu sistem penomoran dimana satu keluarga mempunyai satu nomor rekam medis, penomoran tersebut terdiri dari 6 digit. Kemudian terdapat item-item pada map, formulir, tracer rekam medis dan kartu berobat yang belum sesuai dengan standar.

**Tujuan :** Mendesain ulang map rekam medis dan formulir rawat jalan dengan menekankan aspek isi, fisik, dan anatomi serta mendesain ulang tracer dan kartu berobat di Puskesmas Kasihan II Bantul.

**Metode :** Jenis penelitian ini menggunakan penelitian deskriptif dengan pendekatan kualitatif. Pengumpulan data dilakukan dengan observasi, wawancara dan studi dokumentasi.

**Hasil :** Perancang membuat dua usulan alternatif desain map, formulir, tracer dan kartu identitas berobat. Berdasarkan hasil wawancara terpilih satu usulan desain dengan beberapa saran atas kesepakatan bersama sebelumnya untuk perbaikan rancangan desain map rekam medis, formulir, tracer dan kartu identitas berobat yang terpilih.

**Kata Kunci :** desain map rekam medis, desain formulir, tracer, kartu identitas berobat, rekam medis, puskesmas.

## **MEDICAL RECORD AND FORM DESIGN AT KASIHAN II BANTUL PRIMARY HEALTH CENTER, 2020**

Noor Tata Afni<sup>1</sup> . Laili Rahmatul Ilmi<sup>2</sup>

### **ABSTRACT**

**Background:** Every health facility, one of which is a primary health center, must maintain medical records. Kasihan II Bantul Health Center uses the UNS (Unit Numbering System) numbering system with a family numbering or family folder, which is a numbering system where one family has a medical record number, the numbering consists of 6 digits. Then there are items on the map, forms, medical record tracers, and treatment cards that are not in accordance with the standards.

**Objective:** Redesign the medical record folder and outpatient forms by emphasizing the content, physical and anatomical aspects and redesigning the tracer and medical card at Kasihan II Bantul Health Center.

**Research Method:** The result of this research uses descriptive research with a qualitative approach. Data collection by observation, interview and documentation study

**Conclusion :** The designer made two alternative proposals for map design, forms, tracers, and medical identity cards. Based on the results of the interview selected a design proposal with a-suggestions on the previous joint agreement to improve the design of the medical record folder design, forms, tracers, and medical identity cards selected

**Keywords :** medical record folder design, form design, tracer, medical identity card, medical record, health center
