

## **LITERATURE REVIEW : TINJAUAN ASPEK KEAMANAN REKAM MEDIS DI RUANG *FILING* RUMAH SAKIT**

Aprilia Rahmawati<sup>1</sup>, Ristiana Eka Ariningtyas<sup>2</sup>

### **INTISARI**

**Latar Belakang :** Rumah sakit merupakan penyelenggara kesehatan yang didalamnya terdapat berbagai macam pelayanan, diantaranya pelayanan rekam medis. Rekam medis berisikan informasi medis pasien bersifat rahasia yang wajib dijaga keamanannya oleh rumah sakit. Perlindungan dan pengamanan rekam medis dilakukan di bagian *filing*. Ruang *filing* dapat dikatakan baik apabila berkas rekam medis terjamin keamanannya dari bahaya kerusakan fisik, kimiawi, biologis dan hilang atau pengubahan data oleh pihak yang tidak berhak, karena keamanan merupakan salah satu faktor penting dalam pengelolaan rekam medis.

**Tujuan :** Mengetahui aspek keamanan rekam medis di ruang *filing* Rumah Sakit dari berbagai jurnal.

**Metode :** jenis penelitian yang digunakan adalah *literature review*, menggunakan data yang dikumpulkan dari dua database (Garuda dan *Google Scholar*) dan kata kunci yang digunakan yaitu Tinjauan Aspek Keamanan, Dokumen Rekam Medis, dan Ruang *Filing* Rumah Sakit.

**Hasil :** Berdasarkan analisis kelima jurnal masih ditemukan masalah dari segi debu, pencahayaan, alat perlindungan berkas, kebersihan ruangan, petugas yang makanan minuman ke dalam ruang *filing*, dan pembatasan akses masuk ruang *filing* yang belum sesuai dengan teori aspek keamanan.

**Kesimpulan :** Sebagian besar jurnal ditinjau dari segi aspek fisik, biologis, kimiawi, dan isi belum sesuai dengan teori aspek keamanan.

**Kata Kunci :** Tinjauan Aspek Keamanan, Dokumen Rekam Medis, Ruang *Filing* Rumah Sakit

## **LITERATURE REVIEW: REVIEW OF SECURITY ASPECTS OF MEDICAL RECORDS IN THE ROOM *FILING* HOSPITAL**

Aprilia Rahmawati<sup>1</sup>, Ristiana Eka Ariningtyas<sup>2</sup>

### **ABSTRACT**

**Background:** Hospitals are health providers in which there are various kinds of services, including medical record services. Medical records contain confidential patient medical information that must be kept safe by the hospital. Protection and security of medical record documents are carried out in the section *filing*. The room *filing* can be said to be good if the medical record file is guaranteed to be safe from the dangers of physical, chemical, biological damage and loss or alteration of data by unauthorized parties because security is one of the important factors in managing medical record documents.

**Objective:** knowing the security aspects of medical records in the hospital *filing* room from various journals.

**Methods:** The type of research used is a *literature review*, using data collected from two databases (Garuda and *Google Scholar*) and the keywords used are Review of Security Aspects, Medical Record Documents, and room *Filing* Hospital.

**Result:** Based on the analysis of the five journals, problems were still found in terms of dust, lighting, file protection equipment, room cleanliness, officers who took food and drinks into the room *filing*, and restrictions on access to the room *filing* that was not following theory of security aspects.

**Conclusion:** Most of the journals reviewed in terms of physical, biological, chemical, and content aspects are not in accordance with the theory of security aspects.

**Keyword:** Security Aspects, Medical Record Documents, room *Filing* Hospital.
