

LITERATURE REVIEW: ANALISIS KELENGKAPAN REKAM MEDIS RAWAT INAP DI RUMAH SAKIT

Winarseh¹, Zakharias KP,A.Md.RMIK.,S.IP.,MPH²

INTISARI

Latar belakang : Dalam pemberian pelayanan yang bermutu pengisian dokumen rekam medis yang baik dan benar sangat mempengaruhi mutu dari instalansi kesehatan, salah satunya adalah kelengkapan rekam medis. Dampak pada pengisian rekam medis yang tidak lengkap dapat mempengaruhi biaya admidraasi dari pasien.

Tujuan penelitian ini untuk mengetahui persentasi hasil kelengkapan rekam medis sehingga dapat mengetahui faktor yang mempengaruhi pengisian rekam medis .

Metode penelitian ini menggunakan *Literature Review* dengan pengambilan sampel sebesar 5 Jurnal dan memakai kata kunci *Analisis kelengkapan Rekam medis rawat inap* yang dicari lewat *Google Scholar* .

Hasil dari penelitian ini pada jurnal ke 1 kelengkapan *Review identifikasi* 75%, *Review* pelaporan penting 82% , *Review autentifikasi* 73,2% *Review* pencatatan yang baik dan benar 71,25% .jurnal ke 2 kelengkapan *Review identifikasi* 99%, *Review* pelaporan penting 61% , *Review autentifikasi* 63% *Review* pencatatan yang baik dan benar 72,25% .jurnal ke 3 kelengkapan *Review identifikasi* 100%, *Review* pelaporan penting 69% , *Review autentifikasi* 74,14 % *Review* pencatatan yang baik dan benar 59%. jurnal ke 4 ketidak lengkapan *Review identifikasi* 45.74%, *Review* pelaporan penting 33,31% , *Review autentifikasi* 42,55% *Review* pencatatan yang baik dan benar 27% coretan dan 10% tipe-ex. jurnal ke 5 kelengkapan *Review identifikasi* 75%%, *Review* pelaporan penting 55% , *Review autentifikasi* 79% *Review* pencatatan yang baik dan benar 50% coretan dan 80 tipe-ex. Dari hasil tersebut pengisian berkas rekam medis belum sesuai standar pelayanan minimal dimana pengisian rekam medis diharuskan 100% lengkap.

Saran: antara Petugas rekam medis dan dokter yang bertugas saling bekonfirmasi terhadap pengisian rekam medis .

Kata kunci : analisis kelengkapan, rekam medis, rawat inap.

LITERATURE REVIEW: ANALYSIS OF COMPLETENESS OF MEDICAL RECORDS IN HOSPITAL

Winarseh¹, Zakharias KP,A.Md.RMIK.,S.IP.,MPH²

ABSTRACT

Background: In providing quality services, filling in good and correct medical record documents greatly affects the quality of health installations, one of which is the completeness of medical records. The impact on filling in incomplete medical records can affect the cost of admidation of the patient.

Purpose: This study is to determine the percentage of medical record completeness results so as to determine the factors that affect the filling of medical records.

Methods: This study uses a Literature Review with a sample of 5 journals and uses the keyword Analyst completeness of inpatient medical records searched through Google Scholar.

Results: from this study in the 1st journal completeness Identification review 75%, important reporting review 82%, Authentication review 73.2% Review of good and correct records 71.25%. 2nd journal completeness Identification review 99%, Review reporting important 61%, 63% authentication review. Good and correct recording review 72.25%. 3rd journal completeness 100% identification review, 69% important reporting review, 74.14% authentication review. Good and correct recording review 59%. 4th journal incomplete Identification review 45.74%, important reporting review 33.31%, authentication review 42.55% Review of good and correct records 27% scribbles and 10% ex-type. 5th journal completeness Identification review 75 %%, important reporting review 55%, Authentication review 79% Good and correct recording review 50% scribbles and 80 ex-types. From these results the filling of medical record files has not met the minimum service standards medical requirements are required to be 100% complete .

Suggestion: between the medical record officer and the doctor in charge of mutually confirming the filling of medical records.

Keywords: completeness analysis, medical records, hospitalization.
