

KESIAPAN PENERAPAN REKAM MEDIS ELEKTRONIK RAWAT INAP MENGUNAKAN DOQ-IT DI RS LUDIRA HUSADA TAMA

Ajeng Dwi Ardani¹ , Andi Karisma Nurdiansyah² , Kori Puspita Ningsih³

INTISARI

Latar Belakang : Rumah Sakit Ludira Husada Tama mulai menerapkan RME pada tahun 2019 di bagian rawat jalan. Peneliti menemukan permasalahan bahwa dalam penerapan RME masih terjadi kendala seperti, masih terjadi server down, menu-menu dalam RME belum lengkap, jika dokter atau perawat memasukkan data melalui RME mengalami down maka memasukkan dari awal, kurangnya sosialisasi mengenai penggunaan RME, belum dilakukan evaluasi dengan metode DOQ-IT

Tujuan Penelitian : Mengetahui kesiapan penerapan RME rawat inap pada aspek sumber daya manusia, budaya kerja organisasi, kelola dan kepemimpinan serta infrastruktur di Rumah Sakit Ludira Husada

Metode Penelitian : penelitian ini menggunakan metode studi kasus dengan pendekatan kualitatif.

Hasil : Hasil penelitian kesiapan pada penerapan RME secara keseluruhan sudah baik. Dari aspek sumber daya manusia sudah sangat siap, dari aspek budaya kerja organisasi sudah cukup siap, dari aspek tata kelola dan kepemimpinan sudah sangat siap, dari aspek infrastruktur sudah sangat siap

Kesimpulan : Penerapan Rekam Medis Elektronik (RME) secara keseluruhan sudah sangat siap. Dari aspek sumber daya manusia, tata kelola dan kepemimpinan dan infrastruktur sudah sangat siap, semua petugas merasa puas bagi petugas dalam melayani pasien dan meng-entry data pasien dan mempercepat dalam proses pengumpulan, pengolahan dan penyajian data. Dari aspek budaya kerja organisasi sudah cukup siap, adanya teknologi sistem elektronik mampu memudahkan pelayanan.

Kata Kunci : Kesiapan, Rekam Medis Elektronik, DOQ-IT

ABSTRACT

Background : Ludira Husada Tama Hospital started implementing RME in 2019 in the outpatient department. The researcher found the problem that in the implementation of RME there were still problems such as server down, menus in RME were not complete, if a doctor or nurse entered data through RME it was down then entered from the beginning, lack of socialization regarding the use of RME, no evaluation had been carried out with DOQ-IT method

Research Objectives : Knowing the readiness of implementing inpatient RME in the aspects of human resources, organizational work culture, management and leadership and infrastructure at Ludira Husada Hospital

Research Method : this study uses a case study method with a qualitative approach. Results: The results of the readiness research on the implementation of RME as a whole are good. From the aspect of human resources it is very ready, from the aspect of organizational work culture it is quite ready, from the governance and leadership aspect it is very ready, from the infrastructure aspect it is very ready

Conclusion: The application of Electronic Medical Records (RME) as a whole is very ready. From the aspect of human resources, governance and leadership and infrastructure are very well prepared, all officers are satisfied for officers in serving patients and entering patient data and speeding up the process of collecting, processing and presenting data. From the aspect of organizational work culture, it is quite ready, the existence of electronic system technology is able to facilitate service.
