INTISARI

Latar Belakang: Pendewasaan Usia Perkawinan (PUP) yaitu program atau upaya untuk menaikkan usia pernikahan menjadi 20 tahun bagi wanita dan 25 tahun bagi pria. Program tersebut terbukti dapat mengurangi angka pernikahan dini dalam tiga tahun terakhir dimana pada tahun 2023 turun menjadi 6.92% melampaui target yang ditetapkan tahun 2024 sebesar 8,74%. Namun, mengingat banyak dampak negative pernikahan dini seluruh pihak tetap harus membantu untuk menghapuskan angka pernikahan dini.

Tujuan: Penelitian ini bertujuan untuk mengetahui Pengaruh Pemberian Video Edukasi PUP Terhadap Tingkat Pengetahuan Siswa di Siswa di SMA N 1 Mlati.

Metode: Penelitian ini merupakan penelitian kuantitatif dengan desain *pre-eksperimental* dengan rancangan desain *pretest posttest one group*. Pengambilan sampel menggunakan teknik *purposive sampling* dengan jumlah sampel yaitu 65 responden, analisis data menggunakan uji *Wilcoxon*.

Hasil: Hasil uji *Wilcoxon* menunjukkan nilai $p\text{-value } 0.000 < \alpha = 0.05$. Hasil *pretest* didapat (1.5%) responden tingkat pengetahuannya kurang, (46.2%) cukup, dan (53.8%) baik, pada saat *posttest* pengetahuan responden meningkat menjadi (100%) berpengetahuan baik.

Kesimpulan: Terdapat perubahan yang signifikan antara sebelum dan sesudah dilakukan pemberian video edukasi kepada siswa.

Kata Kunci: Video Edukasi, Pendewasaa Usia Perkawinan, Pengetahuan

ABSTRACT

Background: The Increased Marriage Age Maturation Program is a program aimed at increasing the minimum legal age for marriage to 20 years for women and 25 years for men. This program has effectively reduced the incidence of early marriages, with a notable decrease to 6.92% in 2023, surpassing the 2024 target of 8.74%. Despite this progress, the negative consequences of early marriage persist, necessitating continued efforts from all stakeholders to further reduce its occurrence.

Objective: This research investigated the impact of educational videos about the program on students' knowledge levels at SMA N 1 Mlati.

Method: A quantitative approach employing a pre-experimental design with a pretest-posttest one-group design was utilized. The purposive sampling technique was used to select a sample of 65 respondents. The data of this research were analyzed using the Wilcoxon signed-rank test

Results: The Wilcoxon test yielded a p-value of 0.000, which is less than the alpha level of 0.05. Initial pretest results indicated that 1.5% of respondents had inadequate knowledge, 46.2% had sufficient knowledge, and 53.8% had good knowledge. Post-intervention, all respondents (100%) demonstrated good knowledge.

Conclusion: The provision of educational videos significantly enhanced students' knowledge levels regarding the program, as evidenced by the marked improvement from pretest to posttest scores.

Keywords: Educational Video, Age of Marriage, Knowledge
