**Latar Belakang :** Alat Kontrasepsi Dalam Rahim (AKDR) atau *Intra Uterine Device* (IUD) merupakan salah satu cara efektif yang sangat diprioritaskan pemakaiannya oleh BKKBN. Hal ini dikarenakan tingkat keefektifitasnya cukup tinggi (BKKBN, 2012). Kontrasepsi dalam rahim terbilang efektif karena angka kegagalannya 1-3 kehamilan per 100 wanita pertahun (Hartanto, 2004). Studi pendahuluan yang di lakukan di BPS Yulia Kristiani Tempel Sleman Yogyakarta sebanyak 6 orang (60%) mengatakan belum mengetahui tentang keuntungan serta kerugian kontrasepsi IUD.

**Tujuan Penelitian :** Mengetahui tingkat pengetahuan WUS tentang alat Kontrasepsi IUD di BPS Yulia Kristiani Tempel Sleman.

**Metode :** Penelitian menggunakan metode *deskriptif kuantitatif*. Jumlah populasi yang digunakan adalah 48 responden dengan tehnik pengambilan sampel *accidental sampling* yaitu sebanyak 48 responden yang menggunakan kontrasepsi di BPS Yulia Kristiani Tempel Sleman Yogyakarta. Alat pengumpulan data adalah kuesioner, analisa data menggunakan *univariat*.

**Hasil Penelitian :** Pengetahuan WUS tentang kontrasepsi IUD di BPS Yulia Kristiani Tempel Sleman Yogyakarta dalam kategori cukup.

**Kesimpulan :** Dari penelitian didapatkan pengetahuan WUS tentang alat kontrasepsi IUD di BPS Yulia Kristiani Tempel Sleman Yogyakarta mayoritas memiliki pengetahuan cukup.

**Kata Kunci :** Tingkat Pengetahuan , kontrasepsi IUD

**THE KNOWLEDGE LEVEL OF FERTILE WOMEN ABOUT INTRA  
UTERINE DEVICE (IUD) CONTRACEPTION IN BPS YULIA  
CHRISTIAN TEMPEL SLEMAN YOGYAKARTA**

**ABSTRACT**

**Background:** intra uterine device is one of the effective ways that is highly priority use by the BKKBN. It is because the effectiveness of IUD is quite successful (BKKBN, 2012). Intra uterine device was fairly effective because 1 till 3 of failure rate of 100 woman of pregnancy per year (Hartanto, 2004). This primary study was conducted in BPS Yulia Kristiani Tempel Sleman Yogyakarta used 10 volunteers, the result 6 person (60%) said they did not know the advantages and the disadvantage of intra uterine device (IUD).

**The Objective of the Research:** to know the knowledge level of fertile women about intra uterine device (IUD) contraception in BPS Yulia Kristiani Tempel Sleman.

**Method:** this research using descriptive qualitative method. The number of population is 48 respondents with the sampling technique accidental sampling as many as 48 respondents that using contraception in BPS Yulia Kristiani Tempel Sleman Yogyakarta. The data collecting method is using questionnaire, and the data analysis is using univariate.

**The Results of the Research:** the knowledge of fertile women about intra uterine device (IUD) contraception in BPS Yulia Kristiani Tempel Sleman Yogyakarta is categorize fair.

**Conclusions:** from the research is obtained the majority of women in BPS Yulia Kristiani Tempel Sleman Yogyakarta have enough knowledge about fertile women of intra uterine device (IUD) contraception.

**Keywords: Knowledge Level, intra uterine device (IUD) contraception.**
