INTISARI

Latar Belakang : Posyandu adalah salah satu upaya untuk menurunkan derajat kesehatan di Indonesia dengan tujuan utamanya yaitu menurunkan Angka Kematian ibu (AKI) dan Angka Kematian Bayi (AKB). Rendahnya pengetahuan ibu tentang pemanfaatan posyandu balita berdampak terhadap sikap ibu dalam pemanfaatan posyandu balita. Pengetahuan akan mempengaruhi sikap ibu untuk membawa balitanya ke posyandu setiap bulannya. Berdasarkan studi pendahuluan, dengan mewawancarai kader posyandu masih banyak ibu balita yang belum membawa balitanya ke posyandu. Dari 51 balita hanya sekitar 20 sampai 24 balita yang sering mengikuti kegiatan Posyandu Balita setiap bulannya. Dari jumlah tersebut, tercatat yang tidak naik berat badannya saat penimbangan ada 1 balita, ada 8 balita yang berat badannya turun saat penimbangan serta 1 balita mengalami gizi buruk.

Tujuan : Penelitian ini bertujuan untuk mengetahui gambaran pengetahuan dan sikap ibu balita dalam pemanfaatan posyandu balita di Dukuh Nglengkong Lor Sumberrejo Tempel Sleman.

Metode Penelitian : Penelitian ini menggunakan metode deskriptif kuantitatif. Populasi pada penelitian ini adalah ibu-ibu yang mempunyai balita yang berkunjung di Posyandu Cempaka di Dukuh nglengkong Lor Sumberrejo Tempel Sleman sebanyak 51 responden.
