

**TINGKAT PENGETAHUAN IBU MULTIPARA TENTANG  
KONTRASEPSI TUBEKTOMI DI DUKUH GUYANGAN  
DESA WONOLELO KECAMATAN PLERET  
KABUPATEN BANTUL**

Dwi Kartika Cahyaningtyas<sup>1</sup> Tyasning Yuni Astuti Anggraeni<sup>2</sup>

**INTISARI**

**Latar Belakang:** Tubektomi adalah prosedur bedah sukarela untuk menghentikan fertilitas dengan mengikat atau memasang cincin di tuba falopi, sehingga tidak terjadi pembuahan. Studi pendahuluan yang telah dilakukan puskesmas pleret dalam memberikan penyuluhan tentang kontrasepsi mantap wanita dalam upaya meningkatkan kesejahteraan pengguna KB Metode Operatif Wanita (MOW), namun upaya tersebut belum dapat terlaksana dengan baik. Sehingga dapat diketahui jumlah pengguna KB Metode Operatif Wanita (MOW) di Dukuh Guyangan terdapat 1 orang pengguna KB Metode Operatif Wanita (MOW).

**Tujuan:** Mengetahui tingkat pengetahuan ibu multipara tentang kontrasepsi tubektomi di Dukuh Guyangan Desa Wonolelo Kecamatan Pleret Kabupaten Bantul.

**Metode:** penelitian ini merupakan jenis penelitian *deskriptif kuantitatif* dengan rancangan *survei*. Populasi dalam penelitian ini sebanyak 63 responden dengan menggunakan teknik *purposive sampling*. Besar sampel yang didapatkan 57 responden sesuai dengan *kriteria inklusi* dan *eksklusi*. Instrumen penelitian menggunakan kuesioner tertutup. Analisa data menggunakan *univariate*.

**Hasil:** Hasil penelitian menunjukkan tingkat pengetahuan ibu multipara tentang kontrasepsi tubektomi di Dukuh Guyangan Desa Wonolelo Kecamatan Pleret Kabupaten Bantul dapat dikategorikan pengetahuan baik yaitu 3 responden atau 5.3%, pengetahuan cukup yaitu 43 responden atau 75.4%, pengetahuan kurang yaitu 11 responden atau 19.3%.

**Kesimpulan:** tingkat pengetahuan Ibu Multipara tentang kontrasepsi tubektomi di Dukuh Guyangan Desa Wonolelo Kecamatan Pleret Kabupaten Bantul dapat dikategorikan pengetahuan cukup yaitu 43 responden atau 75.4%.

**Kata Kunci:** Ibu Multipara, KB Tubektomi (MOW)

**THE KNOWLEDGE LEVEL OF MULTI DELIVERY MOTHERS ABOUT  
TUBECTOMY CONTRACEPTIVE IN GUYANGAN SUB VILLAGE,  
WONOLELO VILLAGE, PLERET SUB DISTRICT,  
BANTUL REGENCY**

Dwi Kartika Cahyaningtyas<sup>1</sup> Tyasning Yuni Astuti Anggraeni<sup>2</sup>

**ABSTRACT**

**Background:** Tubectomy is a voluntary surgical procedure in order to eliminate fertility in which a ring is installed or tied in fallopian tube so that conception can be prevented from any progress. Preliminary study was conducted by Pleret community health center during dissemination about female permanent contraceptive in the effort of improving the prosperity of female operative method contraceptive users, but this effort was not optimal in its realization, so that there was one female operative method contraceptive user identified in Guyangan sub village.

**Objective:** To find out the knowledge level of multi delivery mothers about tubectomy contraceptive in Guyangan sub village, Wonolelo village, Pleret sub district, Bantul regency.

**Method:** This was a quantitative descriptive study with survey design. Population was 63 respondents selected through *purposive sampling* technique. Samples were 57 respondents who met *inclusion* and *exclusion* criteria. Study instrument applied closed questionnaires. Data analysis applied single variable analysis.

**Result:** The result revealed that the knowledge level of multi delivery mothers about tubectomy contraceptive in Guyangan sub village, Wonolelo village, Pleret sub district, Bantul regency was in good category as many as 3 respondents (5,3%), sufficient category as many as 43 respondents (75,4%), poor category as many as 11 respondents (19,3%).

**Conclusion:** The knowledge level of multi delivery mothers about tubectomy contraceptive in Guyangan sub village, Wonolelo village Pleret sub district, Bantul regency was in sufficient category as many as 43 respondents or 75,4%.

**Keyword:** Multi delivery mothers, Tubectomy contraceptive (MOW).
