

# **GAMBARAN PENGETAHUAN WANITA USIA SUBUR (WUS) TENTANG ALAT KONTRASEPSI IMPLANT DI PUSKESMAS PAKUALAMAN**

Oktavia Chrisna Putri<sup>1</sup>, Dechoni Rahmawati<sup>2</sup>

## **INTISARI**

**Latar Belakang :** Penduduk merupakan modal penting dalam pelaksanaan pembangunan, namun bila laju pertumbuhan tidak terkendali akan menimbulkan berbagai persoalan. Salah satu upaya pemerintah dalam menekan laju pertumbuhan yaitu melalui program keluarga berencana. DIY tahun 2015, jumlah akseptor keluarga berencana aktif menurut jenis kontrasepsi dari 5 Kabupaten tercatat mencapai 439.605 jiwa. Urutan terendah penggunaan alat kontrasepsi Implant berada di wilayah Kabupaten/Kota Yogyakarta sebanyak 1.016 orang (2,91%). Di Wilayah Kabupaten/Kota Yogyakarta jumlah akseptor Implant terendah berada di Kecamatan Pakualaman, sebanyak 28 orang (0.9 %). Hasil studi pendahuluan di Puskesmas Pakualaman Yogyakarta diperoleh data dari hasil wawancara yang dilakukan pada 10 wanita usia subur akseptor alat kontrasepsi, sebanyak 6 orang belum mengetahui tentang alat kontrasepsi Implant dan sebanyak 4 orang sudah mengetahui tentang alat kontrasepsi Implant.

**Tujuan Penelitian :** Diketuinya gambaran pengetahuan wanita usia subur (WUS) tentang pengertian alat kontrasepsi Implant di Puskesmas Pakualaman.

**Metode Penelitian :** Desain penelitian ini adalah deskriptif kuantitatif. Teknik sampling yang digunakan adalah kuota sampling, dengan jumlah sampel sebesar 52 responden. Penelitian ini menggunakan kuesioner sebagai alat ukur dan analisis data menggunakan univariat.

**Kesimpulan :** Gambaran pengetahuan Wanita Usia Subur (WUS) tentang alat kontrasepsi Implant di Puskesmas Pakualaman sebagian besar adalah cukup yaitu sebanyak 27 responden (51.9%).

**Kata Kunci :** *Pengetahuan, Wanita Usia Subur (WUS), Alat Kontrasepsi Implant*

**ABSTRACT**

**Background :** Society is an important asset in the implementation of the country development, but if the growth rate of our country is not under control, it will lead to many problems. One of the government's effort in suppressing the growth rate is by starting the family planning program implementation. In 2015, the number of active contraceptive acceptors according to the contraception type from 5 Districts that was recorded, had reached 439.605. The lowest place of contraceptive Implant used was in the area of Yogyakarta District itself which was 1.016 person (2.91%). In its area, the lowest number of acceptor contraceptive Implant was in the Pakualaman subdistrict which was 28 person (0.9%). The results obtained from the preliminary study in public health centers of Pakualaman Yogyakarta, from the interview that was conducted on 10 fertile women's as active contraceptive acceptors, as 6 person were not knowing about contraceptive Implant yet and as many 4 person were already know about contraceptive Implant.

**Objective :** To know the overview of fertile women's (FW) knowledge about the definition of contraceptive implant at public health centers of Pakualaman .

**Method :** This research was using descriptive-quantitative research design. The used sampling technique was quota sampling, with a sample of 52 respondents. This research was using questionnaire as a measuring instrument and the data were analyzed using univariate data analysis.

**Conclusion :** The overview of fertile women's (FW) knowledge about the definition of contraceptive Implant at public health centers of Pakualaman are enough which was 27 respondents (51.9%).

**Keyword :** *Knowledge, Fertile Women's (FW), Contraceptive Implant*
