

GAMBARAN SIKAP SUAMI TENTANG KONTRASEPSI VASEKTOMI DI KELURAHAN BENER, KECAMATAN TEGALREJO, KOTA YOGYAKARTA

Ilmu Wahyuningtyas¹, Ekawati²

INTISARI

Latar Belakang: Angka keikutsertaan pria ber-KB di Indonesia masih rendah. Hal itu dikarenakan pengetahuan dan sikap suami terhadap vasektomi masih kurang. Kelurahan Bener, Kecamatan Tegalrejo, Kota Yogyakarta adalah salah satu daerah yang tingkat keikutsertaan vasektominya masih rendah.

Tujuan Penelitian: Untuk mengetahui karakteristik suami dan untuk mengetahui sikap suami terhadap kontrasepsi vasektomi berdasarkan aspek kognitif, afektif dan konatif di Kelurahan Bener, Kecamatan Tegalrejo, Kota Yogyakarta.

Metode Penelitian: Jenis penelitian ini menggunakan *deskriptif kuantitatif* dan dilaksanakan dengan menggunakan pendekatan *Cross Sectional*. Jumlah populasi 260 PUS, sampel 52 responden. Pengambilan sampel dengan *purposive sampling*, pengumpulan data dengan menggunakan kuesioner tertutup non tes dan skala likert yang telah dimodifikasi serta telah dilakukan uji validitas dan reliabilitas, analisis data univariat.

Hasil: Berdasarkan hasil penelitian didapatkan dari aspek kognitif 26 responden (50%) seimbang antara sikap mendukung dan tidak mendukung, berdasarkan aspek afektif sebanyak 27 responden (27%) adalah tidak mendukung, berdasarkan aspek konatif sebanyak 28 responden (53%) adalah tidak mendukung.

Kesimpulan: Dari hasil penelitian dapat disimpulkan bahwa sebagian besar suami di Kelurahan Bener, Kecamatan Tegalrejo, Kota Yogyakarta memiliki sikap tidak mendukung yaitu 30 responden (57,7%).

Kata Kunci: Sikap suami, Kontrasepsi Vasektomi
