

ANALISIS KUALITAS INFORMASI *ELECTRONIC DISCHARGE SUMMARY* DI RUMAH SAKIT BETHESDA LEMPUYANGWANGI

Eisya Noermalita Azzahra¹, Kori Puspita Ningsih², Tika Sari Dewi³

INTISARI

Latar Belakang : *Electronic discharge summary* merupakan bagian penting dari Rekam Medis Elektronik sebagai media komunikasi antar tenaga kesehatan dan dasar pengambilan keputusan klinis. Namun, kualitas informasinya masih terkendala pada kelengkapan dan ketepatan waktu pengisian.

Tujuan Penelitian : Menggambarkan kualitas informasi *electronic discharge summary* di Rumah Sakit Bethesda Lempuyangwangi berdasarkan ketersediaan, aksesibilitas, relevansi, kelengkapan, dan ketepatan waktu.

Metode Penelitian : Penelitian ini menggunakan pendekatan deskriptif kualitatif dengan rancangan studi kasus dan *cross-sectional*. Data diperoleh melalui wawancara, observasi, dan studi dokumentasi.

Hasil : Informasi dalam *electronic discharge summary* tersedia bergantung oleh DPJP. Akses sistem dibatasi sesuai peran pengguna. Informasi relevan dan sesuai standar, tetapi kelengkapan, sistem belum memiliki fitur pendeteksi otomatis untuk kolom kosong, dan pengecekan masih manual. Ketepatan waktu pengisian juga belum optimal karena keterbatasan SDM dan belum adanya SOP resmi.

Kesimpulan : Kualitas informasi dalam *electronic discharge summary* belum sepenuhnya optimal, khususnya dalam aspek kelengkapan dan ketepatan waktu.

Kata Kunci : *electronic discharge summary*, kelengkapan, ketepatan waktu

ANALYSIS OF ELECTRONIC DISCHARGE SUMMARY INFORMATION QUALITY AT BETHESDA LEMPUYANGWANGI HOSPITAL

Eisya Noermalita Azzahra¹, Kori Puspita Ningsih², Tika Sari Dewi³

ABSTRACT

Background : *Electronic discharge summaries are a crucial part of the Electronic Medical Record, serving as a communication tool between healthcare professionals and a basis for clinical decision-making. However, the quality of the information remains limited by its completeness and timeliness.*

Objective : *Describes the quality of electronic discharge summary information at Bethesda Lempuyangwangi Hospital based on availability, accessibility, relevance, completeness, and timeliness.*

Method : *This research uses a qualitative descriptive approach with a case study and cross-sectional design. Data were obtained through interviews, observations, and documentation studies.*

Result : *Information in the electronic discharge summary is available depending on the DPJP. System access is limited by user role. The information is relevant and meets standards, but its completeness is limited. The system lacks automatic detection for blank fields, and checking is still manual. Timeliness of completion is also suboptimal due to limited human resources and the lack of official standard operating procedures.*

Conclusion : *The quality of information in the electronic discharge summary is not yet fully optimal, particularly in terms of completeness and timeliness.*

Keywords : *electronic discharge summary, completeness, timeliness*
