INTISARI

Latar Belakang: Salah satu penyebab kegagalan penerapan *toilet training* adalah adanya perlakuan dan aturan yang ketat dari orang tua kepada anaknya saat mengenalkan cara buang air kecil dan buang air besar dengan benar sehingga orang tua cenderung melarang anak yang ingin buang air saat bepergian.

Tujuan Penelitian: Mengetahui hubungan tingkat pengetahuan ibu tentang *toilet training* dengan praktik *toilet training* pada anak *toddler* di Posyandu Widosari Jatimulyo.

Metode Penelitian: Penelitian ini merupakan penelitian studi korelasi melalui pendekatan *cross sectional*. Sampel dalam penelitian ini adalah seluruh ibu yang menjadi anggota Posyandu Widosari Jatimulyo RW 02 yang berjumlah 31 responden. Teknik sampling menggunakan *total sampling*. Analisa data menggunakan *Kendall Tau*.

Hasil Penelitian: Pengetahuan ibu tentang *toilet training* sebagian besar tergolong cukup yaitu 17 responden (54,8%). Praktik *toilet training* pada ibu yang mempunyai anak usia *toddler* sebagian besar tergolong baik yaitu 23 responden (74,2%). Hasil uji statistik didapatkan nilai τ hitung 0,387 dengan signifikansi (p) 0,034.

Kesimpulan: Ada hubungan tingkat pengetahuan ibu tentang *toilet training* dengan praktik *toilet training* pada anak *toddler* di Posyandu Widosari Jatimulyo.

Kata kunci : tingkat pengetahuan, *toilet training*, anak *toddler*

ABSTRACT

Background: One of the causes in the failure of toilet training implementation is the parents' strict treatment and rules for their children by introducing how to urinate and defecate properly. Therefore, they even forbid their children not to urinate or defecate when they are travelling.

Research Objective: To find the correlation of mothers' knowledge level on toilet training with the toilet training practice for toddlers in the Integrated Post Service (Posyandu) Widosari Jatimulyo.

Research Method: This research is a correlation study research using the cross sectional approach. There were of the research respondents is 31 mothers who become the members of the Integrated Post Service (Posyandu) Widosari Jatimulyo RW 02. The sampling technique applies total sampling. The data analysis uses Kendall Tau method.

Research Findings: Mothers' knowledge on toilet training is mostly enough that is 17 respondents (54.8%). The toilet training practice of mothers with toddlers is mostly good that is 23 respondents (74.2%). The statistical test results in the τ calculated value of 0.387 with the significance value (p) of 0.034.

Conclusion: There is a correlation between the mothers' knowledge on toilet training with the toilet training practice for toddlers in the Integrated Post Service (Posyandu) Widosari Jatimulyo.

Keywords: Knowledge level, toilet training, toddler
