### GAMBARAN RESPON SUAMI TENTANG PROGRAM KELUARGA BERENCANA (KB) PRIA DI DESA NOGOTIRTO, KECAMATAN GAMPING, SLEMAN

Kocmelia Gusti Widya Wati<sup>1</sup>, Ratih Kumoro Jati<sup>2</sup>

**Latar Belakang:** Partisipasi pria dalam KB sampai saat ini masih rendah. Sejak digalakan pada tahun 1970, program KB selalu identik wanita atau istri. Banyak faktor yang mempengaruhi rendahnya partisipasi pria. Selain itu reaksi atau respon para suami yang mengikuti KB juga mempengaruhi partisipasi suami dalam ber-KB. Ada beberapa faktor yang mempengaruhi respon suami tentang program KB pria yaitu pengetahuan pria tentang program KB, dukungan istri, dukungan tokoh masyarakat (TOMA) atau tokoh agama (TOGA), sosial budaya masyarakat, dan persepsi suami.

**Tujuan Penelitian:** Untuk mengetahui gambaran respon suami tentang program keluarga Berencana (KB) pria berdasarkan pengetahuan suami tentang program pria, dukungan istri, dukungan TOMA/TOGA, sosial budaya masyarakat, dan persepsi pria di Desa Nogotirto, Kecamatan Gamping, Sleman.

**Metode Penelitian:** *Deskriptif kuantitatif* dengan pendekatan *survey*. Lokasi yang diambil di Desa Nogotirto, Kecamatan Gamping, Sleman. Subyek penelitian adalah suami akseptor KB usia 20-49 tahun. Sampel dalam penelitian ini sebanyak 74 orang dengan teknik pengambilan sampel secara *simple random sampling*. Instrumen penelitian menggunakan kuesioner hasil penelitian dikategorikan dengan rumus respon positif jika  $\geq \frac{1}{2} K$  dan respon negatif  $< \frac{1}{2} K$  setelah itu analisa data menggunakan analisis *univariat* dengan rumus P.

**Hasil Penelitian:** Respon suami di Desa Nogotirto tentang program KB pria berdasarkan pengetahuan suami respon positif ada 66 orang (89,2%) dan respon negatif ada 8 orang (10,8%), berdasarkan dukungan istri respon positif ada 70 orang (94,6%) dan respon negatif ada 4 orang (5,4%), berdasarkan dukungan TOMA dan TOGA respon positif ada 64 orang (86,5%) dan respon negatif ada 10 orang (13,5%), berdasarkan sosial budaya masyarakat respon positif ada 69 orang dan respon negatif ada 5 orang (6,8%), dan berdasarkan persepsi pria respon positif ada 66 orang (89,2%) dan respon negatif ada 8 orang (10,8%).
