

ABSTRACT

DESCRIPTION OF HUSBAND PARTICIPATION IN BREAST-FEEDING AT 'PANTI BAHAGIA' MATERNITY HOSPITAL AT MAGELANG DISTRICT

Hariyanti¹, Astuti², Pitara³

Background: The success of the process of breastfeeding is influenced by many factors, one of which is the support and participation of the husband. In various study concluded that the participation of the husband has a positive correlation to the success of the process lactation. Role in enhancing the success of breastfeeding husband is determined to create situations that allow granting Mother's Milk run smoothly. Nevertheless many studies that explain that the level of husband's participation in the provision of breast milk is relatively less.

Objective: This study aimed to get a description of husband's participation in the delivery of Mother's Milk.

Methods: This study is a descriptive study with cross sectional method. Population and sample of this study was the husband of the mother who gave birth at the Panti Bahagia maternity hospital of Magelang. Data obtained by giving the questionnaire to be filled by the study subjects

Results: Results showed that 80% of husbands had a positive attitude towards the process response of Mother's Milk by their wife. This may be strongly associated with education level and occupation of respondents and previous child care experience.

Conclusion: Based on the results of research that has been in the analysis can be deduced that husband's participation in the RB Panti Bahagia Magelang in 2011 are mostly positive participation of as many as 24 people (80.0%) while the negative participation of as many as 6 people (20%).

Keywords: husband's participation, breast feeding

GAMBARAN PARTISIPASI SUAMI DALAM PEMBERIAN AIR SUSU IBU (ASI) DI RUMAH BERSALIN PANTI BAHAGIA KOTA MAGELANG

Hariyanti¹, Astuti², Pitara³

Latar Belakang: Keberhasilan proses menyusui dipengaruhi oleh banyak faktor, salah satu diantaranya adalah dukungan dan partisipasi dari suami. Dalam berbagai penelitian disimpulkan bahwa partisipasi suami mempunyai korelasi positif terhadap keberhasilan proses laktasi. Peran suami dalam meningkatkan keberhasilan menyusui ditentukan menciptakan situasi yang memungkinkan pemberian Air Susu Ibu berjalan lancar. Meskipun demikian banyak penelitian yang menjelaskan bahwa tingkat partisipasi suami dalam pemberian Air Susu Ibu relatif kurang.

Tujuan: Penelitian ini bertujuan untuk mendapatkan gambaran tentang partisipasi suami dalam pemberian Air Susu Ibu..

Metode: Penelitian ini merupakan penelitian deskriptif dengan metode seksional silang. Sampel penelitian adalah suami dari ibu yang melahirkan di Rumah Bersalin Panti Bahagia Kota Magelang. Data diperoleh dengan memberikan kuesioner untuk di isi oleh subyek penelitian

Hasil: Hasil penelitian menunjukkan bahwa 80% suami mempunyai partisipasi positif terhadap proses pemberian Air Susu Ibu. Hal ini sangat terkait dengan tingkat pendidikan dan pekerjaan responden serta pengalaman merawat anak sebelumnya.

Kesimpulan: Berdasarkan hasil penelitian yang sudah di analisis dapat ditarik kesimpulan bahwa partisipasi suami di RB Panti Bahagia Kota Magelang Tahun 2011 sebagian besar adalah partisipasi positif sebanyak 24 orang (80,0%) sedangkan partisipasi negatif sebanyak 6 orang (20%).

Kata Kunci: Partisipasi, Pemberian Air Susu Ibu
