

ABSTRACT

SUCCESSORS' KNOWLEDGE LEVEL ABOUT THE IMPLEMENTATION OF POSYANDU WITH 5 TABLES SYSTEM IN TRIWIDADI VILLAGE, PAJANGAN SUB-REGION, BANTUL REGION, 2011

Ishni Istianah ¹, Nunik Endang ², Alfie Ardiana Sari ³

Background : One of efforts in society empowerment in health field is to develop Posyandu . Posyandu is run by health successprs who have had education and training from medical workers. In order to run its program successfully, Posyandu applies 5 tables system consists of registration, scale, documentation, health dissemination and health examination. The emergence of Posyandu concept is aimed to accelerate the decrease of mother and baby, mortality death throuhg society empowerment effort.

Objective : This research is meant to find out successors' knowledge level about the implementation of Posyandu with 5 tables system in Triwidadi Village.

Method : This reseach is descriptive research with survey time approach, population are 126 successors, sampling technique is *Accidental Sampling* with 56 respondents. Data collecting instrument is questionnaire in the form of closed question. Data processing uses frequency distribution.

Result : From all 56 respondents who are tested. It is found out that successors' knowledge level about posyandu as many as 66.1 % are in sufficient category, and successors' knowledge level about the implementation of 1-5 tables system as many as 76.8% are in sufficient category

Conclusion : Successors' knowledge level about Posyandu implementation system of 1-5 tables and implementation of Posyandu with 5 tables system are in sufficient category. Therefore, in order to increase successors' knowledge level about the implementation of Posyandu with 5 tables system, it is hoped that the health workers in community Health Center hold trainings once a month minimally so that successors can be more active in the activity of Posyandu especially with 5 tables system

ABSTRAK

TINGKAT PENGETAHUAN KADER TENTANG PELAKSANAAN POSYANDU SISTEM LIMA MEJA DI DESA TRIWIDADI KECAMATAN PAJANGAN KABUPATEN BANTUL TAHUN 2011

Ishni Istianah¹, Nunik Endang², Alfie Ardiana Sari³

Latar belakang : Salah satu bentuk upaya pemberdayaan masyarakat dibidang kesehatan adalah menumbuhkan kembangkan Posyandu. Posyandu dilaksanakan oleh kader-kader kesehatan yang telah mendapatkan pendidikan dan pelatihan dari petugas kesehatan. Untuk mensukseskan program kegiatannya posyandu menggunakan sistem 5 meja yang terdiri dari pendaftaran, penimbangan, pencatatan, penyuluhan kesehatan dan pemeriksaan kesehatan. Munculnya konsep Posyandu bertujuan untuk mempercepat penurunan Angka Kematian Ibu, bayi dan balita melalui upaya pemberdayaan masyarakat.

Tujuan : Penelitian ini bertujuan untuk mengetahui tingkat pengetahuan kader tentang pelaksanaan posyandu sistem lima meja

Metode : Metode penelitian ini menggunakan metode *deskriptif*, dengan pendekatan waktu *survey*, populasi sebanyak 126 kader, teknik pengambilan sampel dengan *Accidental Sampling* dengan jumlah sample 56 responden. Alat pengumpulan data adalah kuesioner berbentuk pertanyaan tertutup. pengolahan data menggunakan rumus *distribusi frekuensi*

Hasil : Secara keseluruhan dari 56 responden yang diteliti didapatkan tingkat pengetahuan kader tentang posyandu sebanyak (66.1%) dalam kategori cukup sedangkan tingkat pengetahuan kader tentang pelaksanaan sistem meja 1-5 sebanyak (76.8%) dalam kategori cukup

Kesimpulan : Tingkat pengetahuan kader tentang posyandu, tingkat pengetahuan kader tentang sistem pelaksanaan meja 1-5 dan tingkat pengetahuan kader tentang pelaksanaan Posyandu sistem lima meja dalam kategori cukup. Oleh karena itu untuk meningkatkan tingkat pengetahuan kader tentang pelaksanaan Posyandu sistem lima meja diharapkan pada petugas puskesmas untuk mengadakan pelatihan minimal 1 bulan sekali agar para kader dapat lebih aktif dalam kegiatan posyandu khususnya sistem lima meja.
