ABSTRACT

Background: The MDGs have become an important reference of development in Indonesia, the accomplishments needed an independent community for a healthy life that take precedence on the preventive, promotive and empowering families and communities in the areas of health such as foster Integrated Service Post (Posyandu). Based on preliminary study of the conditions for the implementation of Posyandu at Tegalyoso Village, there are still many shortcomings and some cadres who were interviewed did not know the roles, functions and activities of Posyandu.

Objective: Knowing Posyandu cadres level of knowledge and the implementation of Posyandu activities in Tegalyoso Village 2011

Methods: This study is deskriptif, using cross-sectional approach. The population in this study were all of the cadres of Posyandu in Tegalyoso Village, Klaten consisted of 30 cadres of 5 Posyandu, where the total population is being sampled (total sampling). Questionnaire research instruments.

Results: The majority level of cadres' knowledge about Posyandu is lack of knowledge (53,3%), enough of knowledge (20%), and good of knowledge (26,7%). The implementation is lack of Posyandu activities in Tegalyoso Village 2011 (60%), good implementation of Posyandu activities (20%)

Conclusion: The Posyandu cadres' knowledge is lack (53,3%), and the implementation of Posyandu activities in Tegalyoso Village is lack (60%).

Suggestion: It is expected that Posyandu cadres to increase their knowledge about Posyandu, by joining many kinds of training so that the implementation of Posyandu activities could run well.

Key words: level of knowledge of Posyandu cadres, implementation of Posyandu activities.

ABSTRAK

Latar belakang : *MDGs* telah menjadi referensi penting pembangunan di Indonesia, pencapaiannya diantaranya menumbuhkembangkan Pos Pelayanan Terpadu (Posyandu). Kondisi pelaksanaan Posyandu di Desa Tegalyoso masih banyak kekurangan antara lain: sistem pelaksanaan Posyandu masih banyak kekurangan, dan sebagian kader yang diwawancarai tidak mengetahuinya peran, fungsi dan kegiatan Posyandu.

Tujuan : Mengetahui tingkat pengetahuan kader tentang Posyandu dan pelaksanaan kegiatan Posyandu di Desa Tegalyoso tahun 2011.

Metode : Penelitian ini merupakan penelitian deskriptif dengan pendekatan *cross sectional*. Populasi dalam penelitian ini adalah semua kader Posyandu di Desa Tegalyoso Klaten sebanyak 30 kader dari 5 Posyandu, dimana total populasi menjadi sampel (*total sampling*). Instrumen penelitian kuesioner dan *check list*.

Hasil : Tingkat pengetahuan kader tentang Posyandu mayoritas kurang (53,3%), cukup (20%), baik (26,7%). Pelaksanaan kegiatan Posyandu tidak baik (60%), baik (20%).

Simpulan : Tingkat pengetahuan kader tentang Posyandu kurang (53,3%), Pelaksanaan kegiatan Posyandu tidak baik (60%).

Saran : Diharapkan kader posyandu meningkatkan pengetahuan tentang Posyandu dengan banyak mengikuti pelatihan-pelatihan sehingga pelaksanaan Posyandu dapat berjalan baik.

Kata kunci : Tingkat pengetahan kader Posyandu , pelaksanaan kegiatan Posyandu.
