Latar Belakang Masalah: Pelayanan antenatal merupakan bagian dari program Kesehatan Ibu dan Anak. Pelayanan antenatal hendaknya menggunakan asuhan standar minimal yang telah ditetapkan oleh pemerintah sejak tahun 1999 menjadi standar “7T” yang dahulunya hanya “5T”. Standar minimal ibu hamil “7T” tersebut yaitu timbang berat badan, ukur tekanan darah, ukur tinggi fundus uteri, pemberian imunisasi TT, pemberian tablet Fe, tes penyakit menular seksual serta temu wicara dalam rangka persiapan rujukan.

Tujuan Penelitian: Diketuinya penerapan standar 7T dalam pelayanan *antenatal care* pada bidan di Puskesmas Panggang I Gunungkidul.

Metode Penelitian: Jenis penelitian *observasional (non eksperimental)*. Populasi penelitian adalah bidan yang berada di Puskesmas Panggang 1 Gunungkidul sebanyak 6 bidan. Teknik pengambilan sampel menggunakan *total sampling* dengan perolehan sampel sebanyak 6 bidan. Alat pengumpulan data menggunakan lembar observasi. Analisis data yang digunakan adalah *univariat* yang digambarkan dalam bentuk hasil prosentase.

Hasil Penelitian: Pelaksanaan standar pelayanan ANC mayoritas baik, pada penimbangan BB ibu hamil sebesar 50%, pemeriksaan tekanan darah sebesar 50%, pemeriksaan pada fundus uteri sebesar 66,7%, pelaksanaan standar imunisasi TT (*Tetanus Toksoid*) adalah cukup sebesar 66,7%, pemberian tablet Fe sebesar 66,7%, pemeriksaan penyakit menular seksual (PMS) tidak dilakukan karena tidak ada sarana pemeriksaan PMS. Pelaksanaan standar temu wicara pada ibu hamil adalah cukup sebesar 83,3%. Penerapan standar 7T dalam pelayanan *antenatal care* pada bidan adalah cukup sebesar 83,3%.

Kesimpulan: Penerapan standar 7T dalam pelayanan *antenatal care* pada bidan di Puskesmas Panggang I Gunungkidul adalah cukup. Tenaga kesehatan khususnya bidan dapat menerapkan standar praktek *Antenatal Care* pada pemeriksaan ibu hamil.

Kata Kunci: Evaluasi, standar 7T pelayanan *antenatal care*, bidan

THE EVALUATION OF THE IMPLEMENTATION OF THE 7T STANDARD IN THE ANTENATAL CARE SERVICE OF THE MIDWIVES IN THE HEALTH CENTRE OF PANGGANG 1 GUNUNGKIDUL

ABSTRACT

Endang Riyatiningsih¹, Supiyati², Endang Supriyati³

Background: Antenatal Care Service is part of the Maternal and Child Health program. Antenatal care services should use the minimum standards that have been implemented by the government since 1999 to a standard "7T" which used to be only "5T". Minimum 7T standards of pregnant women are: measuring the weight, measuring blood pressure, measuring fundus uteri level, TT immunization, provision of Fe tablets, STD tests and colloquim in preparation for a referral.

Research objectives: To reveal the application of 7T standards in antenatal care service at midwives health center in Panggang I Gunungkidul.

Research Methods: This research is an observational research (non experimental). The study population are midwives in the health center of Panggang I Gunungkidul as many as 6 midwives. The sampling technique used is the total sampling with the acquisition of a sample of six midwives. Analysis of the data used is univariate.

Study result: The implementation of the standard weight on the weighing of pregnant women is good for 50%, implementation of standard blood pressure in pregnant women is good for 50%, the standard implementation in pregnant women to check on the fundus uteri is good at 66.7%, the implementation of the TT immunization standard (tetanus toxoid) in pregnant women is enough for 66.7%, a standard implementation of the provision of iron tablets to pregnant women is good for 66.7%, a standard implementation of the examination of sexually transmitted diseases (STDs) in pregnant women is not done because there is no means of STDs examination. Implementation of standards in pregnant women colloquium is sufficient for 83.3%. The application of 7T standards in Ante Natal Care service on midwives is medium as many as 83,3%

Conclusion: The application of 7T standards in antenatal care service of the midwives at the health center in Panggang I Gunungkidul health centre is medium. Health representatives especially midwives can apply Ante Natal Care practice standards on pregnant mothers health checking.

Keywords: Evaluation, 7T standard, antenatal care.
